Journal Writing in Second Language Education—Christine Pearson Casanave 2011-02-04 Journal writing is not new—journals have been around for centuries. More recently, journals have been viewed as a means of scaffolding reflective teaching and encouraging reflectivity in research processes. As a result, some educators may ask, “What more do we need to know?” Those likely to raise this question are probably not thinking of the explosive growth of reflective writing enabled by social networking on the Web, the blogs and other interactive e-vehicles for reflection on experiences in our literate, “real,” and virtual lives This revisiting of journal writing from a 21st century perspective, informed by relevant earlier literature, is what Christine Pearson Casanave guides readers through in this first book-length treatment of the use of journal writing in the contexts of language learning, pre and in-service teaching, and research. Casanave has put together existing ideas that haven’t been put together before and has done it not as an edited collection, but as a single-authored book. She has done it in a way that will be especially accessible to teachers in language teacher education programs and to practicing teachers and researchers of writing in both second and foreign language settings, and in a way that will inspire all of us to think about, not just do, journal writing. Those who have never attempted to use journals in their classes and own lives, as well as others who have used it with mixed results, will probably be tempted to try it in at least some of the venues Casanave provides guidance for. Those already committed to journal writing will very likely find in this book new reasons for expanding and enhancing their use of journals.

Innovation and Accountability in Teacher Education—Claire Wyatt-Smith 2018-10-24 This is the foundational book for the new series, Teacher Education, Learning Innovation and Accountability. The book canvasses research, practice and policy perspectives in teacher education across diverse geographic, social and political contexts. It explores the lifespan of teacher development from initial preparation through to graduate classroom practice as it occurs in an intensifying culture of standards and regulation. The characterization of initial teacher education (ITE) in a crucible of change permeates throughout the book. The chapters open up new ways of thinking about innovation and accountability in ITE and the professionalization of teaching, exploring fundamental questions, such as “Who are the actors in teacher preparation and how do they interact? How can we learn about the quality of teacher education? Where can we hear the voices of teacher educators and preschool teachers, as well as school-based teacher educators? What are the new and emerging roles of others in teacher education who have not been involved previously, including employing authorities?” (p. 22). While the book provides responses to
these and other provocative questions, it also offers new insights into innovative teacher education from a wide range of policy and practice contexts.

Why is HDFS important? How does theory and research inform work in HDFS? What does the pursuit of being an ethical professional require? What are the key areas in HDFS? Incredibly user-friendly both on the page and online, the text also features the following resources: Chapter Summaries where the main points of each chapter are pinpointed at the end of every chapter for review and study. Key Terms listed and defined within the margins of every chapter, a complete Glossary at the end of the text, and Flashcards online for additional review and study.
